

SteMaxOne™ Media

Cell Culture Media for Human Mesenchymal Stem Cells

SteMaxOne™ is a chemically defined, protein and peptide-free culture media for human mesenchymal stem cells.

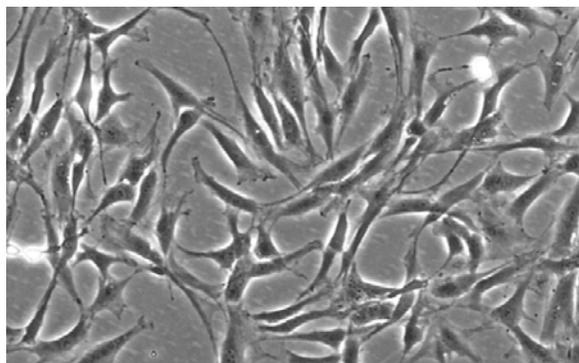

SteMaxOne™ medium can be used alone or as a basic nutrient mixture in combination with growth and maintenance factors selected by the user.

FEATURES:

- **Free of hormones, proteins, peptides, and animal-derived components**
- **Free of complex additives such as albumines, hydrolysates, and yeast extract**
- **Exclusively made of small molecules listed in CAS- and EINECS registers**
- **Can be used as is or customized, unlike competing products**

Available as liquid preparation ready for use or as liquid concentrate kits for higher volumes.

hMSC-TERT cells in SteMaxOne (Stem Cell 1) medium supplemented with 8 ng/mL bFGF and 2 mM L-glutamine.
